Help Canadians put their tax refund to work

Help Canadians put their tax refund to work

Did you know that nearly **6 out of 10 taxreturns** filed last year resulted in an average refund of **\$1,696**.¹

This provides a great opportunity for you to help Canadians secure their financial future in a way that perhaps they have not considered before.

How? By investing in a Critical Illness Insurance Policy... even better, a CI Policy with Return of Premium Benefits. Your clients get a cash benefit to help them financially during their critical illness recovery period. And if they never make a claim, they can surrender their policy and get their premiums refunded, just in time for retirement.

Help Canadians put their tax refund to work.
